

# Photographs of Steam Railways

From BritPics.co.uk

4-Star Web-Weaver

# PDF Document containing Photographs from <http://www.britpics.co.uk/>

The new way to collect photographs from the World Wide Web.

Portable Document Files are an easy way to share documents across the Internet, thanks to Adobe and their free Acrobat Reader anyone with access to the Internet can view high quality documents easily and cheaply. For publishers it is a fairly simple way to have their documents made available to a wide audience.

This document contains photographic images from the BritPics galleries. The first image is 800x1245 pixels. The other images have a resolution of 960x720 pixels and all can be printed on most colour printers.

Adobe Acrobat enables you to just print off the part of the document appearing in the window. In this way you can print a single picture to an A4 sheet which can then be framed and hung on your wall at home without the trouble and expense of taking the image to a printers.

## Pictures of Steam Railways

Steam Engines have a fascination for all, and there has never been so many available to see in the UK since the 1960's.

The Churnet Valley Railway near Leek in Staffordshire operates steam engines almost every day and in the first photo we see the Ditchat Manor ready to leave the station at Consall Forge on its way to Cheddleton.

BR tank engine 80098 is ready to leave Cheddleton Station south bound to Froghall in the top picture on page 5.

Below we have the 3802 4-4-0 approaching Carrog station on the Llangollen Railway after going round the loop to return to its train.

Page 6 has two more photographs of this engine at Carrog station in North Wales on the Llangollen Railway.

The top photo on page 7, is again of 3802, this was taken at Llangollen Station.

Then we move to Norfolk with a picture of 61572 pulling into Weybourne station.

The North Norfolk Railway, Poppy Line, have a website at this url:  
<http://www.nnrailway.co.uk/index.htm>

Weybourne station is a delightful country station that has featured in a number of TV productions, the next photo on page 8 was taken from the train looking along the platform.

The following picture shows the same engine, 61572 from the road bridge to the west of the station.

On page 8 61572 has arrived at Holt station and the final photograph takes us back to the Churnet Valley Railway and is of the first train to leave Froghall on a cold winters morning.
